

Getting Tested for Corona virus

I am sick.

My family think I have the Corona virus.

I need to have a test to see if I have the Corona virus.

My family will bring me to get the test.

The nurse or doctor will test me.

The nurse or doctor will wear special clothes.

The special clothes keep everyone safe.

They will put a swab in my mouth and in my nose.

A swab is like a big cotton bud.

It is ok if I am scared.

It is ok if I am sad.

My family will help me
if I am scared or sad.

I have to wait
a few days to find out
if I have Corona virus.

After the test
I will have to stay
in my house.
Only my close family
can come into my
house.

Being in the house is
hard.
My family will help
me.

My family will bring
me food and things
to do.

I will wait to find out
if I have Corona
virus.
